A spotless, beautiful, brand-new year! A year like that your childhood knew. In the first act there is the atmosphere of the gay life in London with a story of the penniless Duke of Barchester and the little rose girl who gives the opera its name.

FACE DISFIGURED WITH PIMPLES

And Blackheads. Would Itch, Burn and Smart. Arms and Back Affected. Cuticura Soap and Ointment Cured in Four Weeks.

Ruffin, N. C. — "My face became full of pimples and blackheads, and would itch, burn and smart. The skin was rough and red. I was really ashamed of my face. My arms and back were affected almost as badly. The pimples would fester and there would come a dry scab on top. The trouble caused my face to be disfigured badly and the itching would bother me so I could not sleep well nights, especially during warm weather.
"I used all kinds of ointments, cold creams, powders, soaps, medicine and all kinds of different remedies for my face and arms, but from none did I get any benefit. The trouble lasted me three long years without anything doing me any good until a friend told me about Cuticura Soap and Ointment and then I decided to try them. After the first application I could see some improvement. After using Cuticura Soap and Ointment two weeks I did not look like the same person; most of the pimples had disappeared. At the end of four weeks I was completely cured." (signed) Miss Mamie Mitchell, Jan. 9, 1913.
It costs nothing to learn how pure, sweet, effective and satisfying Cuticura Soap and Ointment are in the treatment of most complexion, red, rough hands, itching scalp, dandruff, dry, thin and falling hair, because you need not buy them until you try them. Cuticura Soap 25c. and Cuticura Ointment 50c. are sold everywhere. Liberal sample of each mailed free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. T, Boston."

OFFICIALS GUARD PUBLIC HEALTH

MUCH SCIENTIFIC RESEARCH AND WORK AGAINST DISEASE. POLLUTION OF RIVERS, ETC.

Washington, Jan. 3.—Uncle Sam's health patrol is catching its breath on New Year's Day in anticipation of the biggest year's work it ever has undertaken. The summary of the last twelve months of its work contains a record of heroic fights against disease, opposition to the invasion of foreign maladies, and excursions into new fields of medical exploration, which has had no equal in the history of the organization.

Experts working under the directions of Surgeon Gen. Rupert Blue and Assistant Surgeon Gen. Rucker have, during the last year, covered every nook and corner of the country, routing out unknown diseases, cleaning up infested places, teaching communities and individuals how to guard against disease and protecting the American public against diseased immigrants, unhealthful surroundings, infected rats and polluted drinking water.

Working in All Sections.
From the mountains of Kentucky, where two field hospitals and dispensaries are teaching the people how to combat pellagra to the water fronts of San Francisco and Seattle, where federal experts are helping state authorities in their fight to prevent the carrying of plague germs by rats and squirrels, the public health service has ranged its activities into many unusual fields.

Much of the research work for the service is done in the hygienic laboratory in Washington. In the search for the means by which infantile paralysis is transmitted, the experts there succeeded during the last year in carrying germs from one monkey to another by the bite of a stable fly. But where this succeeded once it failed on all other attempts and the public health service is still working on the problem of coping with this disease.

Pollution of the rivers and other dangers to communities close to them is under examination now in the valleys of the Missouri, Mississippi, Ohio and the Potomac rivers. A comprehensive investigation of pellagra is being directed from Savannah and malaria is being studied at the Mobile Marine Hospital.

Studying Sanitation.
Practically every phase of sanitation is being studied and taught by the public health service officials as fast as funds permit. During the last year each expert of the service, no matter on what work he might be detailed, has been acting as a traveling inspector of railway trains and vessels reporting any violations of the interstate regulations governing the drinking cups, pure water, toilet towels and the like.

Over 35,000 Indians on reservations in twenty-five states, were examined under direction of the public health service during the last year to determine the prevalence of trachoma and consumption. More than 22 per cent of the Indians were found to be sufferers from trachoma and drastic measures have been recommended by the health officers to meet the situation.

WESTERN HOG RAISER

Can Oklahomans Show Profits Equal to These Made in Northwest?
Spokane, Wash., Jan. 3.—Out of the profits realized from three pigs, purchased a year ago for \$30 each, J. K. Smawley, a farmer living 80 miles south of Spokane, has started on a trip around the United States.

Smawley has \$525 for the trip, and in addition has the three pigs with which he started his herd. At the Lewiston (Idaho) live stock show a little more than a year ago he purchased the original trio of Berkshire hogs for \$30 each. With a delegation of their offspring he returned to the live stock show this year, and his young pigs won six blue ribbons.

There was a lively demand for his young porkers, and he sold 15 for \$35 each, a total of \$525. With this sum, which he characterizes as "revelry," because hog raising with him is a side issue to wheat farming, Smawley has started his journey, which will include stops at New York, Washington, Baltimore, points in the Carolinas, where he formerly lived, and in other southern states. He will return through Oklahoma, California and Oregon.

LINCOLN HIGHWAY COAST TO COAST

THOUSANDS WILL GO OVERLAND TO PANAMA EXPOSITION BY AUTO. PLAN TO BEAUTIFY.

Plans to beautify the Lincoln highway, making it attractive in appearance as well as useful, are now being considered by the officers of the association. It is proposed next spring on Arbor Day to have the children of the public and parochial schools plant trees along the side of the road. William Miller, professor of horticulture of the State University of Illinois, and Edward C. Rumley, of the Interlaken School, Rolling Prairie, Ind., have both endorsed the project.

"During six years of residence in Germany the advantage of their system of growing trees along public highways collects from \$250,000 to \$500,000 annually from the fruit of these trees and they also add greatly to the attractiveness of the highways. It should be possible to create further interest in the Lincoln Highway by inducing the schools of the country, adjacent to the Highway, to set aside a day next spring on which their children could plant trees. This would be an invaluable lesson in school work, as well as a contribution to the Highway."

Napoleon Lajoie, of the Cleveland American League club, is among the recent contributors to the \$10,000,000 fund of the Lincoln Highway Association.

Frank X. Mudd, chairman of the Runs and Tours committee of the Chicago Automobile club, announces to members of that organization that a tour of the club will start about June 1, 1915, to the Panama-Pacific exposition in San Francisco. The specific date will be announced later. Mr. Mudd declares that many hundred members have already announced their intention of making the trip by automobile with their families, and with the route thoroughly marked and great stretches improved, little difficulty or delay is expected in making the journey on a seven to ten-day schedule.
